

# EPIM Joint Qualification System

## Purpose

EPIM JQS is a service that enables pre-qualification of suppliers to the operators on the Norwegian Continental Shelf (NCS).

In 2018 a new Joint Qualification Solution (JQS) will be implemented by all operators on the NCS. The solution will be made available to all suppliers on October 1<sup>st</sup> 2018. EPIM JQS will be hosted exclusively by EPIM by January 1st 2019.

## EPIM JQS

---

# Goes live October 1st

## Essence

- A solution for pre-qualification of suppliers and their products and services
- The solution provides key information about the suppliers and their capability assessments of own operating management systems
- The solution facilitates selection of relevant suppliers to be included in procurement processes

## Benefits

- Makes it possible to find all relevant suppliers based on their products and services
- Offers access to supplier's key contact information
- Provides one common verification process for both suppliers and operators
- Access to business register information, credit score and financial data
- Modern user experience with cognitive search functionality and analytics available for reporting and analysis

## Users

- All operators on the Norwegian continental shelf (NCS)
- Suppliers to the oil and gas industry

---
